

Immunization Requirements

The Downtown Clinic Immunization Requirements align with the CDC immunization requirements for healthcare clinics.

We require all volunteers, interns, and staff members to have OR show proof of:

- **Tuberculosis testing:** Blood test (IGRA) date and results or TB skin test date/s and results - once unless more recent possible exposure.
- **Influenza vaccination:** Required annually by the end of November
- **Varicella (chickenpox):** documentation of 2 varicella vaccinations, clinical disease of chickenpox or shingles by an HCP, or date/serologic testing
- **Measles, mumps, & rubella (MMR):** documentation of 2 MMR vaccinations, clinical disease by an HCP, or date/serologic testing
- **Tetanus, diphtheria, and pertussis:** Tdap vaccinations every 10 years
- **Hepatitis B vaccination and/or serology testing - only for those with exposure to blood or body fluids doing clinical work:** 2 or 3 doses of vaccine (brand dependent) and a positive serology test

We strongly encourage COVID-19 vaccinations, but this vaccination is no longer required.
